Fax (973) 334-1494

## **PUBLIC NOTICE**

### Water Distribution System Flushing

Please be advised that the Borough will be conducting routine flushing of its water distribution system May 7th from 10pm to 2am, to ensure your continued high quality water service. Flushing also allows for the monitoring and maintenance of fire hydrants.

When crews are working in your area, you may experience reduced water pressure or discoloration. If you notice any discoloration, run the cold water until clear before using. This should take only a few minutes. It is recommended that you avoid washing clothes during these periods of time.

We thank you in advance for your cooperation and understanding.
